

## Healthcare and Medical Studies

**FIRST, DO NO HARM.**  
BUT ALWAYS DO YOUR BEST.

The nursing program at Estrella Mountain will prepare you for immediate employment in the healthcare industry, one of the most in demand skill sets in the nation. As the newest site of the Maricopa Community College District's nursing program, the program prepares students for immediate entry into the workforce with a combination of classroom, lab, and real world clinical experience. In addition to a solid foundation in math and science, including chemistry, microbiology, biology, and anatomy and physiology, students will study nursing science, pharmacology, psychology and more. A practicum experience in a variety of healthcare settings will enable students to expand their skill sets while providing care to patients, enhancing their classroom knowledge, and establishing work history in this exciting career field that actively changes the lives of others.

**IT TAKES A VILLAGE TO RAISE A CHILD.**  
THE VILLAGE NEEDS A LEADER.

A career in education can be among the most rewarding, and one that makes a direct impact on the future of your community, your world. As you prepare to complete your university studies in secondary or elementary education, social work, child development and psychology, begin your program of study at Estrella Mountain, with courses in Child Development, Introduction to the Exceptional Learner, Serving English Language Learners, Children's Literature, Storytelling, Early Childhood Education, Family-School Interaction, Social Work, Social Service Delivery Systems, and Effective Helping in a Diverse World. In addition to classroom experience, participate in service learning opportunities which have a direct impact on your community, and provide real world experience directly affecting the lives of others in a positive way. You are inspired to dream, and your dreams will inspire others as you reach out to make a positive impact on the lives of children and families in your community.
